CROP SUMMARY FOR THE WEEK ENDING April 27, 2014

NEW MEXICO: Days suitable for fieldwork were 5.9. Topsoil moisture was 45% very short, 19% short and 36% adequate. Subsoil moisture 40% very short, 19% short and 41% adequate. Wind damage was 12% light, 32% moderate and 8% severe. Freeze damage was reported at 15% light, 7% moderate and 18% severe.

Counties: Rio Arriba: High winds brought temperatures down. High elevations received snow. Some cattle will be going out to pasture on USFS allotments on May 1st. Taos: Last week's rain showers have slightly improved pasture to green grass and a little growth. This week has been cold and windy with some chance of rain showers at the end of the week. Farm activities are cleaning out irrigation ditches and starting of 1st irrigation for the crop year. Curry: Some rainfall in the areas last week in varying amounts but no significant improvement in dryland wheat or pastures and wind quickly eliminated any trace. Irrigated wheat continues to show good condition with rapid growth. Areas of dry land are still being grazed but small chance of harvest for grain. Pastures still showing some green but in need of moisture soon. Livestock condition still very good for this time of year. Luna: Some hail damage was reported in the southern part of the county on April 19th. Chaves: High winds Saturday and Sunday.

CROP PROGRESS PERCENTAGES WITH COMPARISONS

Crop	Stage	This Week	Last Week	Last Year	5-Year Average
Alfalfa	1st cut	25	17	23	25
Chile	Planted	90	74	85	87
Cotton	Planted	55	52	29	45
